

# Marine Applications

Diesel Engines

**JOHN DEERE**

The powerful and reliable choice

## Marine applications

# Nothing Runs Like A Deere™

John Deere PowerTech™ engines are as powerful in the water as they are on the land. Our marine propulsion and generator engines share the same reputation for performance and reliability that their agricultural and industrial counterparts have enjoyed for decades. They are also backed by a vast service network that will keep you operating — no matter where you go.

When you choose John Deere, you get the support of one of the strongest engine and equipment companies in the world. See for yourself why more vessels are being powered by John Deere.

## Clean engines — clean air

With John Deere PowerTech engines, everything runs clean and efficiently — above and below deck. John Deere marine engines offer closed crankcase vents that eliminate undesirable gases in the engine room and keep the bilge clean.

John Deere also protects the air outside your boat by complying with international, European, and United States emissions standards for regulated vessels. John Deere meets Environmental Protection Agency (EPA) Marine Tier 3 emissions regulations with a complete line of PowerTech engines for newly constructed vessels as well as repowered boats.

- EPA Tier 3 regulations for vessels flagged in the United States
- European Union Nonroad Mobile Machinery (NRMM – 97/68/EC as amended), whose standards are also recognized by the CCNR for sailing on the Rhine
- European Union Recreational Craft Directive (RCD – 94/25/EC as amended)
- Emissions certified engines over 130 kW (174 hp) meet regulations set out in Annex VI of the International Maritime Organization (IMO) MARPOL convention. Engine International Air Pollution Prevention (EIAPP) certificates issued by the U.S. EPA or American Bureau of Shipping (ABS) are available for select engine models. **Visit your John Deere dealer for details.**

## Engines for non-regulated territories

In addition to the engines for various emissions regulations mentioned, John Deere offers engines for the non-regulated regions throughout the world.

## Marine classification societies

John Deere has worked with various marine classification societies allowing the use of our engines in vessels designed and built to the society's requirements.

# Propulsion engines — more power in the water

John Deere PowerTech™ engines are built for long life, reliable performance, fuel efficiency, quiet operation, ease of access to main parts, and simplified integration. They give you the power you need when you're on the water. Choose reliable John Deere engines from 60 to 559 kW (80 to 750 hp).

Model designation key

6135SFM85

- Emissions
  - 50 – Non-emissions regulated
  - 70, 75, 76, 85 – Emissions regulated
- Indicates air intake system
  - DFM – Naturally aspirated
  - TFM – Turbocharged
  - AFM – Turbocharged and aftercooled, air-to-coolant
  - SFM – Turbocharged and aftercooled, air-to-seawater
- Displacement in liters
- Number of cylinders

A John Deere marine engine model designated as 6135SFM85 is a 6-cylinder, 13.5-liter turbocharged and aftercooled, air-to-seawater engine that is emissions regulated.

## Propelled performance

John Deere engines give you an effective blend of pure power and rugged toughness. Our full, high-horsepower lineup offers the right engine for your needs — each of them with added torque at slower speeds. The result? John Deere engines build power faster and cruise at a higher speed with a lower rpm. Boost your vessel's performance in swells, tides, or currents with reliable power that's ready when you are.

4.5L  
60 – 168 kW  
80 – 225 hp

6.8L  
115 – 298 kW  
154 – 400 hp

9.0L  
213 – 410 kW  
285 – 550 hp

13.5L  
272 – 559 kW  
365 – 750 hp

## Marine propulsion M ratings

Ratings are based on the ISO 8655 standard power rating and the SAEJ1228 crankshaft power rating.

The M rating definitions are provided as a guide to help in the selection of the engine that best fits the application requirements. It is recommended to consult a John Deere representative to verify the optimal rating for the specific application.

The **M1** rating is for marine propulsion applications that may operate up to 24 hours per day at uninterrupted full power and have load factors\* greater than 65 percent.

**Possible applications:** Line hauls tugs and towboats, fish and shrimp trawlers/draggers, and displacement hull fishing boats.

The **M2** rating is for marine propulsion applications that typically operate between 3,000 to 5,000 hours per year and have load factors\* up to 65 percent. This rating is for applications that are in continuous use and use full power for no more than 16 hours of each 24 hours of operation. The remaining time of operation is at or below cruising† speed.

**Possible applications:** Short-range tugs and towboats, long-range ferryboats, large passenger vessels, and offshore displacement hull fishing boats.

The **M3** rating is for marine propulsion applications that typically operate between 2,000 to 4,000 hours per year and have load factors\* up to 50 percent. This rating is for applications that use full power for no more than four hours out of each 12 hours of operation. The remaining time of operation is at or below cruising† speed.

**Possible applications:** Coastal fishing boats, offshore crew boats, research boats, short range ferryboats, and dinner cruise boats.

The **M4** rating is for marine propulsion applications that typically operate between 1,000 to 3,000 hours per year and have load factors\* below 40 percent. This rating is for applications that use full power no more than one hour out of each 12 hours of operation. The remaining time of operation is at or below cruising† speed.

**Possible applications:** Inshore crew boats, charter fishing boats, pilot boats, dive boats, and planning hull commercial fishing boats.

The **M5** rating is for marine recreational propulsion and certification for light-duty commercial Tier 3 applications that operate between 300 to 1,000 hours per year and have load factors\* below 35 percent. This rating is for applications that use full power for no more than 30 minutes out of each eight hours. The remaining time of operation is at or below cruising† speed.

**Possible applications:** Recreational boats, tactical military vessels, and rescue boats.

\* Load factor is the actual fuel burned over a period of time divided by the full-power fuel consumption for the same period of time. For example, if an engine burns 160 liters of fuel during an eight-hour run, and the full-power fuel consumption is 60 liters per hour, the load factor is 160 liters / (60 liters per hour x 8 hours) = 33.3 percent.

† Cruising is any operating time where the engine speed is more than 200 rpm less than the maximum attainable engine speed.

## Marine Engine Propulsion Power Ratings

*Ratings are subject to change. Please contact your John Deere marine dealer for details.*

# Auxiliary power that’s ready when you are

John Deere PowerTech™ engines are engineered to run vessel auxiliaries such as pumps, winches, deck cranes, and hydraulics. With displacements from 4.5 liters to 13.5 liters and power ratings from 74 to 448 kW (99 to 600 hp), fitting your application has never been easier. We also offer a choice of options and accessories.

## We’ve got you covered when it comes to emissions

John Deere provides a full line of PowerTech engines that meet U.S. Environmental Protection Agency Marine Tier 3 emissions regulations.\*

## Complete your work with confidence

See your John Deere marine dealer or engine distributor for complete specifications on our full line of reliable, fuel-efficient John Deere auxiliary drive engines. Log on to [www.JohnDeere.com/dealer](http://www.JohnDeere.com/dealer) to find the service dealer nearest you.

Ratings: Constant Speed

Engine model	Displacement		Rated power		Rated speed
	L	cu in	kW	hp	rpm
4045HF285	4.5	275	129	173	1800
4045TF285	4.5	275	78	105	1800

Ratings: Variable Speed

Engine model	Displacement		Rated power		Rated speed
	L	cu in	kW	hp	rpm
4045TF285	4.5	275	74	99	2200

# Generator drive engines — the strong silent type

For reliable power from 40 to 416 kW (54 to 558 hp), John Deere generator drive engines deliver quiet, smooth operation that never lets you down. You may even forget they are aboard until you turn on the lights or plug in an appliance. This quiet reliability is why John Deere is a preferred provider of generator drive engines worldwide. They are available in 1500 rpm for 50 Hz and 1800 rpm for 60 Hz configurations.

## Quiet operation and low vibration

We strive to design engines that go almost unnoticed. This is why all the moving parts are dynamically balanced. The torque available at low rpm helps with fast load response.

- Water-cooled exhaust manifold for cooler, quieter performance
- Engine isolators with optional mounting supports
- All 4-cylinder models have internal balance shafts to eliminate vibration

PowerTech radiator-cooled generator drive engines  
40 – 416 kW  
54 – 558 hp

## Marine generator engine ratings

The marine generator engine rating is the power available under normal varying electrical load factors\* for an unlimited number of hours per year in commercial applications. This rating incorporates a 10 percent overload capability, and conforms to ISO 8528 prime power. Average load over a 24-hour period shall not exceed 67 percent of the prime rating, of which no more than two hours are between 100 percent and 110 percent of the prime rating.

This rating is used for applications that required constant speed in auxiliary applications.

\* Load factor is the actual fuel burned over a period of time divided by the full-power fuel consumption for the same period of time. For example, if an engine burns 160 liters of fuel during an eight-hour run, and the full-power fuel consumption is 60 liters per hour, the load factor is 160 liters / (60 liters per hour x 8 hours) = 33.3 percent

## Marine emergency power gen-sets

John Deere Power Systems provides radiator-cooled, dry-exhaust manifold PowerTech gen-set engines that carry marine society approvals.

Ratings: Marine Emergency Power Gen-Sets

Engine model	Displacement		Rated power		Rated speed
	L	cu in	kW	hp	
6068HF275	6.8	514	111	149	1500

## Marine Engine Generator Drive Power Ratings

# Effortless engine power

## Easy to install

John Deere marine engines can be configured for propulsion, generator set, and auxiliary applications. Our full range of reliable, fuel-efficient engines have the power to meet your needs. We also offer a choice of options and accessories to fit any application.

The simple and clean design of John Deere marine engines allows direct access to connection and service points for the cooling system, fuel supply, lubrication system, and exhaust system.

- Compact design for easy installation
- Front PTO with electronic clutch to drive pumps and accessories
- SAE flywheel and housing options
- Wet or dry exhaust elbows
- Keel cooled or heat exchanger cooled

## Easy to operate

Prewired instrument panel provides electronic control of engine functions and instant access to engine diagnostics.

- Includes tachometer, oil pressure, voltmeter, water temperature, and hour meter gauges
- Electronic information display is bright and easy to read
- Multilanguage text display

## Easy to maintain

- Internal coolant passages eliminate hoses and fittings
- Dipstick and oil fill on either side
- Poly-vee belt drive increases durability
- Washable, dry-type air filters can be serviced quickly and easily
- Replaceable wet liners, precision-joint connecting rod/cap joint, and replaceable valve seats make rebuilding easy
- Gear timing maintenance-free during entire life of engine

## Customer support

### A worldwide support network

The proven John Deere dealer network of over 4,000 service locations is prepared to fully support you and your engines. From around the globe, John Deere engine distributors and service dealers are your best source for engine service, knowledge, and parts. Our dealers keep John Deere maintenance and repair parts in stock to get you back on the water quickly. Also, John Deere's worldwide parts distribution system has overnight delivery in most areas of the world.

To find the nearest John Deere engine distributor or service dealer, visit [JohnDeere.com/dealer](http://JohnDeere.com/dealer).

### Genuine John Deere parts

There's a reason John Deere engine parts have such a strong reputation — quality. Other companies claim their repair parts meet or exceed OEM specifications. But the only real way to ensure performance is to use engine parts designed by John Deere for John Deere engines. Rely on the quality and support of genuine John Deere parts and service to keep your engine running like new. Before your next long voyage, prepare your vessel with a customized Preventive Maintenance Kit filled with genuine John Deere parts.

With just a few clicks, get the parts you need through [JDParts.JohnDeere.com](http://JDParts.JohnDeere.com). Order from anywhere at any time using your phone, tablet, or laptop.

- Order online through your local dealer, 24/7/365
- Ship to your dealer or to your home as early as next day
- Search parts by model number, part number, or keyword
- Take advantage of local John Deere dealer pricing and inventory
- Get access to parts catalogs with product images

Fast. Convenient. Online.  
[JDParts.JohnDeere.com](http://JDParts.JohnDeere.com)

### Qualified John Deere technicians

Only John Deere service technicians have the expertise to ensure top performance of your John Deere engine. Our technicians continuously participate in specialized training on John Deere engine technology, diagnostic tools, and service techniques. Trust your John Deere engine technician to have repairs completed quickly and accurately, and get you back on the water without worries.

### Warranty you can count on

At John Deere, we stand behind every engine we build. That's why our warranty covers your John Deere marine engine for an unlimited number of hours during the first 12 months of use, or up to 2,000 hours in the first 24 months. Our warranty plans also protect genuine John Deere engine parts and accessories. Contact your John Deere engine distributor or service dealer for standard coverage details and extended warranty options.

Be sure to register your John Deere OEM engine and take full advantage of the John Deere service and support network. Registering your engine not only prepares us to support your warranty needs but also allows us to keep you informed on new products, services, and money-saving offers from John Deere.

You can register your John Deere OEM engine by simply scanning this code or visiting [JohnDeere.com/enginewarranty](http://JohnDeere.com/enginewarranty).
